## FIRST® Robotics Competition 21st Century Learning Skills Alignment & Instructional Exemplars

## Rationale

There is no evidence that the standard is addressed as part of a *FIRST*® program.

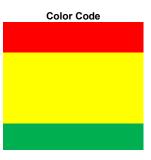

This standard potentially could be addressed as part of a *FIRST*® program either by actions that the coach/mentor takes when working with the students or by conditions established by the program for that given year.

The standard is clearly addressed by program activities.

History

Civics

Government and

work and community contexts

## **FIRST**® **Student Outcomes** Alignment English, reading or language arts World languages Arts Mathematics Using 21st century skills to Global Core Subjects Economics understand and address Awareness Science global issues Geography History Government and Civics English, reading or language arts World languages Learning from and working Arts collaboratively with individuals representing diverse cultures, Mathematics Global Core Subjects Economics religions and lifestyles in a Awareness Science spirit of mutual respect and Geography open dialogue in personal,

## Instructional Exemplar

Depending on the extension activities that the FIRST® Robotics Competition team participates in, team members may have the opportunity to research, understand, and develop potential solutions to global issues.

Depending upon the composition of the FIRST® Robotics Competition team and the regions in which they compete, students may have the opportunity to learn and work with students from different cultures. Collaboration through scouting and competing may increase the degree to which students possess the attitudes and beliefs for living in a world where national cultures are converging and civilization is becoming more global.

Core Subjects	Science Geography History Government and Civics	Global Awareness	Understanding other nations and cultures, including the use of non-English languages	
Core Subjects	English, reading or language arts World languages Arts Mathematics Economics Science Geography History Government and Civics English, reading or	Financial, economic, business and entrepreneuri al literacy	Knowing how to make appropriate personal economic choices	
Core Subjects	language arts World languages Arts Mathematics Economics Science Geography History Government and Civics	Financial, economic, business and entrepreneuri al literacy	Understanding the role of the economy in society	
Core Subjects	English, reading or language arts World languages Arts Mathematics	Financial, economic, business and entrepreneuri al literacy	Using entrepreneurial skills to enhance workplace productivity and career options	

Civics

Depending upon the composition of the FIRST® Robotics Competition team and the regions in which they compete, students may have the opportunity to learn and work with students from different cultures. Collaboration through scouting and competing may increase the degree to which students possess the attitudes and beliefs for living in a world where national cultures are converging and civilization is becoming more global.

As part of the FIRST® Robotics Competition students will work with money as they have to budget for robot parts, tools, and other materials to participate in the competition.

As part of the FIRST® Robotics Competition students will work with money as they have to budget for robot parts, tools, and other materials to participate in the competition which allows them to develop an understanding of how the economy works.

As part of the FIRST® Robotics Competition students will use their entrepreneurial skills to fundraise to support the purchase of robot parts, tools, and other materials to participate in the competition.

Core Subjects	Science Geography History Government and	Civic literacy	Participating effectively in civic life through knowing how to stay informed and understanding governmental processes
Core Subjects	Civics English, reading or language arts World languages Arts Mathematics Economics Science Geography History Government and Civics II, reauing or	Civic literacy	Exercising the rights and obligations of citizenship at local, state, national and global levels
Core Subjects	language arts World languages Arts Mathematics Economics Science Geography History	Civic literacy	Understanding the local and global implications of civic decisions
Core Subjects	Government and Énignsii, reauring or language arts World languages Arts Mathematics Economics Science Geography History Government and	Health literacy	Obtaining, interpreting and understanding basic health information and services and using such information and services in ways that are health enhancing
Core Subjects	Eiiginsii, reauing or language arts World languages Arts Mathematics Economics Science Geography History Government and	Health literacy	Understanding preventive physical and mental health measures, including proper diet, nutrition, exercise, risk avoidance and stress reduction

Depending upon how the coach/mentor chooses to interact with local government and civic agencies (e.g., Chamber of Commerce) FIRST® Robotics Competition students may learn about and participate in governmental processes.

Depending upon how the coach/mentor chooses to interact with local government and civic agencies (e.g., Chamber of Commerce) FIRST® Robotics Competition students may exercise their rights as they apply for grants or request funding from governmental agencies.

Core Subjects	English, reading of language arts World languages Arts Mathematics Economics Science Geography History Government and English, reading of	Health literacy	Using available information to make appropriate health-related decisions	
Core Subjects	Science Geography History Government and	Health literacy	Establishing and monitoring personal and family health goals	
Core Subjects	Enginsii, reauing or language arts World languages Arts Mathematics Economics Science Geography History Government and	Health literacy	Understanding national and international public health and safety issues	
Core Subjects	Eṅġñsn, reaung or language arts World languages Arts Mathematics Economics Science Geography History Government and Eṅġñsn, reaung or	Environmenta I literacy	Demonstrate knowledge and understanding of the environment and the circumstances and conditions affecting it, particularly as relates to air, climate, land, food, energy, water and ecosystems	
Core Subjects	language arts World languages Arts Mathematics	Environmenta I literacy	Demonstrate knowledge and understanding of society's impact on the natural world (e.g., population growth, population development, resource consumption rate, etc.)	

During the short and intense build season, students learn to make choices about nutrition, sleep and exercise that will ensure that all team members remain healthy.

During the short and intense build season, students learn to make choices about nutrition, sleep and exercise that will ensure that all team members remain healthy.

Not Applicable

Depending on the extension activities that the FIRST® Robotics Competition team participates in, team members may have the opportunity to research, understand, and develop potential solutions to environmental issues.

Depending on the extension activities that the FIRST® Robotics Competition team participates in, team members may have the opportunity to research, understand, and develop potential solutions to societal impact on the natural world.

Core Subjects	Science Geography History Government and	Environmenta I literacy	Investigate and analyze environmental issues, and make accurate conclusions about effective solutions
Core Subjects	Chignsii, reading or language arts World languages Arts Mathematics Economics Science Geography History Government and	Environmenta I literacy	Take individual and collective action towards addressing environmental challenges (e.g., participating in global actions, designing solutions that inspire action on environmental issues)
Learning and Innovation Skills	Creativity and Innovation	Think Creatively	Use a wide range of idea creation techniques (such as brainstorming)
Learning and Innovation Skills	Creativity and Innovation	Think Creatively	Create new and worthwhile ideas (both incremental and radical concepts)
Learning and Innovation Skills	Creativity and Innovation	Think Creatively	Elaborate, refine, analyze and evaluate their own ideas in order to improve and maximize creative efforts
Learning and Innovation Skills	Creativity and Innovation	Work Creatively with Others	Develop, implement and communicate new ideas to others effectively
Learning and Innovation Skills	Creativity and Innovation	Work Creatively with Others	Be open and responsive to new and diverse perspectives; incorporate group input and feedback into the work
Learning and Innovation Skills	Creativity and Innovation	Work Creatively with Others	Demonstrate originality and inventiveness in work and understand the real world limits to adopting new ideas

Depending on the extension activities that the FIRST® Robotics Competition team participates in, team members may have the opportunity to research, understand, and develop potential solutions to environmental issues.

Depending on the extension activities that the FIRST® Robotics Competition team participates in, team members may have the opportunity to research, understand, and develop potential solutions to environmental issues.

Students use brainstorming to generate robot design, game strategy, and fundraising ideas as they work to successfully build and program their robot and compete

In building their robot, *FIRST*® Robotics Competition students create new ideas to address the game challenge and problems they encounter as part of designing, building, programming, and operating a robot.

Students engage in a process of elaboration and refinement to settle on the most optimal design and game strategy.

Students must communicate ideas effectively with team members to address real-world problems they encounter as well as share the team's solution with others.

Students must be open to all individual ideas and work together to develop an agreed upon solution for the design of the robot and the game strategy.

Students develop an innovative solution to a challenge of designing, building, and programming a robot to compete successfully within the parameters of the competition.

Learning and Innovation Skills	Creativity and Innovation	Work Creatively with Others	View failure as an opportunity to learn; understand that creativity and innovation is a long-term, cyclical process of small successes and frequent mistakes	In building their robot, <i>FIRST</i> ® Robotics Competition students constantly refine their solutions and learn from mistakes.
Learning and Innovation Skills	Creativity and Innovation	Implement Innovations	Act on creative ideas to make a tangible and useful contribution to the field in which the innovation will occur	Students create an innovative solution to real- world problems they encounter as they design, build, program, and operate their robot and develop their game strategy.
Learning and Innovation Skills	Critical Thinking and Problem Solving	Reason Effectively	Use various types of reasoning (inductive, deductive, etc.) as	Students use all types of reasoning to develop and refine the innovative solutions they develop to problems they encounter during the
Learning and Innovation Skills	Critical Thinking and Problem Solving	Use Systems Thinking	Analyze how parts of a whole interact with each other to produce overall outcomes in complex systems	As students design their robot they have to consider how all parts of the robot will work together, how all team members will work together, and how their team will interact with other teams to produce the desired outcome
Learning and Innovation Skills	Critical Thinking and Problem Solving	Make Judgments and Decisions	Effectively analyze and evaluate evidence, arguments, claims and beliefs	As students design, build, program, and operate their robot, they will have to analyze and evaluate evidence as they make their decisions.
Learning and Innovation Skills	Critical Thinking and Problem Solving	Make Judgments and Decisions	Analyze and evaluate major alternative points of view	As a FIRST® Robotics Competition team is made up of several individuals, students will need to analyze and evaluate alternative points of view as they settle on final solutions for robot design, construction, programming, and operation.
Learning and Innovation Skills	Critical Thinking and Problem Solving	Make Judgments and Decisions	Synthesize and make connections between information and arguments	Students will research information and synthesize information to create innovative solutions to the real-world problems they encounter as they design, build, program, and operate their robot
Learning and Innovation Skills	Critical Thinking and Problem Solving	Make Judgments and Decisions	Interpret information and draw conclusions based on the best analysis	In designing their robot, students will interpret information and determine how best to use it to create an innovative robot and game strategy.
Learning and Innovation Skills	Critical Thinking and Problem Solving	Make Judgments and Decisions	Reflect critically on learning experiences and processes	As part of continual improvement, students will reflect on their ideas and approaches to designing their robot and game strategy to refine their processes.
Learning and Innovation Skills	Critical Thinking and Problem Solving	Solve Problems	Solve different kinds of non- familiar problems in both conventional and innovative ways	As part of the competition, students will be expected to solve many types of non-familiar problems as they design, build, and program their robot and develop their game strategy.

Learning and Innovation Skills	Critical Thinking and Problem Solving	Solve Problems	Identify and ask significant questions that clarify various points of view and lead to better solutions
Learning and Innovation Skills	Communication and Collaboration	Communicate Clearly	Articulate thoughts and ideas effectively using oral, written and nonverbal communication skills in a variety of forms and contexts
Learning and Innovation Skills	Communication and Collaboration	Communicate Clearly	Listen effectively to decipher meaning, including knowledge, values, attitudes and intentions
Learning and Innovation Skills	Communication and Collaboration	Communicate Clearly	Use communication for a range of purposes (e.g. to inform, instruct, motivate and persuade)
Learning and Innovation Skills	Communication and Collaboration	Communicate Clearly	Utilize multiple media and technologies, and know how to judge their effectiveness a priori as well as assess their impact
Learning and Innovation Skills	Communication and Collaboration	Communicate Clearly	Communicate effectively in diverse environments (including multi-lingual)
Learning and Innovation Skills	Communication and Collaboration	Collaborate with Others	Demonstrate ability to work effectively and respectfully with diverse teams
Learning and Innovation Skills	Communication and Collaboration	Collaborate with Others	Exercise flexibility and willingness to be helpful in making necessary compromises to accomplish a common goal
Learning and Innovation Skills	Communication and Collaboration	Collaborate with Others	Assume shared responsibility for collaborative work, and value the individual contributions made by each team member

Students will need to ask questions of each other, their coach/mentor, and subject-matter experts to develop their solution.

Students will have to communicate effectively with each other as well as others to design, build, and program their robot, develop their game strategy, to raise funds and to apply and compete for awards.

Students will have to listen effectively to each other to complete tasks and a develop collective solution.

Students will communicate for a wide range of purposes as they talk to their peers, visitors to the pits, sponsors and award judges.

Depending upon how students decide to present in their pits, during fundraising activities, and for award judging, they will use multiple media and technologies. Students use technical software for programming and/or building the robot.

Depending upon the make up of the team and their community and the type of outreach the team chooses to conduct, students may work with students in diverse environments. Teams may also build relationships with international teams through mentoring activities.

Students will work with individuals on their team to design, build, program and operate the robot and develop a game strategy. Many teams also work with other domestic and international teams. In addition, teams must evaluate other teams performance to form alliances and work together to obtain points on the competition field.

Students will work with individuals on their team to develop the best innovative solution as they design, build, program and operate the robot and develop a game strategy.

Students work collaboratively to complete tasks and develop a team solution to the Challenge.

Information, Media and Technology Skills	Information Literacy	Access and Evaluate Information	Access information efficiently (time) and effectively (sources)
Information, Media and Technology Skills	Information Literacy	Access and Evaluate Information	Evaluate information critically and competently
Information, Media and Technology Skills	Information Literacy	Use and Manage Information	Use information accurately and creatively for the issue or problem at hand
Information, Media and Technology Skills	Information Literacy	Use and Manage Information	Manage the flow of information from a wide variety of sources
Information, Media and Technology Skills	Information Literacy	Use and Manage Information	Apply a fundamental understanding of the ethical/legal issues surrounding the access and use of information
Information, Media and Technology Skills	Media Literacy	Analyze Media	Understand both how and why media messages are constructed, and for what purposes
Information, Media and Technology Skills	Media Literacy	Analyze Media	Examine how individuals interpret messages differently, how values and points of view are included or excluded, and how media can influence beliefs and behaviors
Information, Media and Technology Skills	Media Literacy	Analyze Media	Apply a fundamental understanding of the ethical/legal issues surrounding the access and use of media
Information, Media and Technology Skills	Media Literacy	Create Media Products	Understand and utilize the most appropriate media creation tools, characteristics and conventions

Students must determine the types of information they need to complete design, build and program their robot, community outreach, and fundraising.

Students must evaluate information about designing, building, and programming the robot for the optimal performance on the playing field. They will also evaluate information from test runs of the robot to refine performance.

Students will use information gained through research to develop an innovative solution to real-world problems the encounter during the competition.

Students will have to evaluate information from multiple sources to make decisions and address problems that arise as they design, build, program, and operate their robot.

If teams choose to apply for awards, they will demonstrate command of issues of multi media through Website design and all published communications

If teams choose to apply for awards, they may take time to discuss making a media message and the intent and overall impact of the choices made. They will be aware of the purpose of all writings including marketing plans, fundraising letters, grant proposals and Executive Summaries.

If teams choose to apply for awards, they may take time to discuss making a media message and the intent and overall impact of the choices made.

If teams choose to apply for awards, they will demonstrate command of issues of multi media through Website. design and all published communications. Students should be able to identify copyright material and electronic publications.

Depending on the presentation choices, the type of awards teams choose to apply for, and whether a team has the opportunity to attend a League Meet, students will use a variety of media creation tools.

Information, Media and Technology Skills	Media Literacy	Create Media Products	Understand and effectively utilize the most appropriate expressions and interpretations in diverse, multi-cultural environments	
Information, Media and Technology Skills	ICT Literacy	Apply Technology Effectively	Use technology as a tool to research, organize, evaluate and communicate information	
Information, Media and Technology Skills	ICT Literacy	Apply Technology Effectively	Use digital technologies (computers, PDAs, media players, GPS, etc.), communication/networking tools and social networks appropriately to access, manage, integrate, evaluate and create information to successfully function in a	
Information, Media and Technology Skills	ICT Literacy	Apply Technology Effectively	knowledge economy Appry a furnamental understanding of the ethical/legal issues surrounding the access and use of information	
Life and Career Skills	Flexibility and Adaptability	Adapt to Change	Adapt to varied roles, jobs responsibilities, schedules and context	
Life and Career Skills	Flexibility and Adaptability	Adapt to Change	Work effectively in a climate of ambiguity and changing priorities	
Life and Career Skills	Flexibility and Adaptability	Be Flexible	Incorporate feedback effectively	
Life and Career Skills	Flexibility and Adaptability	Be Flexible	Deal positively with praise, setbacks and criticism	

Depending upon the make-up of the team and location of the competition, students may present in diverse, multicultural environments. Many teams also work with other domestic and international teams. In addition, teams alliances and must work with this partner to obtain points on the competition field.

Throughout the program, students will use technology as a tool to design, build, program, and operate their robot as well as to communicate with other teams or present information.

If the coach/mentor deems it appropriate students may use technology to manage their information and communicate with subjectmatter experts.

If teams choose to apply for awards, they will demonstrate command of issues surrounding the access and use of information technology.

Students will work collaboratively as a team to compete which will include changing roles and responsibilities. On the competition field, alliances have to work together to determine offensive/defensive strategies based on the strengths of each team's robots and the robots they are competing against.

As students research and design their robot, students will have to narrow their focus and define the parameters of their work, while shifting priorities as is necessary.. Students will incorporate feedback from peers, their coach/mentor, and experts to refine their robot.

Students will receive feedback from peers, their coach/mentor and experts that they will need to incorporate into their processes and solution.

Life and Career Skills	Flexibility and Adaptability	Be Flexible	Understand, negotiate and balance diverse views and beliefs to reach workable solutions, particularly in multi- cultural environments	must re the cor other c additio work w the cor
Life and Career Skills	Initiative and Self- Direction	Manage Goals and Time	Set goals with tangible and intangible success criteria	As par studen focus f robot.
Life and Career Skills	Initiative and Self- Direction	Manage Goals and Time	Balance tactical (short-term) and strategic (long-term) goals	Studer accom term go and op a comp
Life and Career Skills	Initiative and Self- Direction	Manage Goals and Time	Utilize time and manage workload efficiently	Studer a spec team a

Life and Career Skills	Initiative and Self- Direction	Be Self- directed Learners	Reflect critically on past experiences in order to inform future progress	Studer and the improv reflecti develo reflecti

Students will work in a collaborative team and must reach agreed upon solutions to complete the competition. Many teams also work with other domestic and international teams. In addition, teams compete in alliances and must work with this partner team to obtain points on the competition field.

As part of FIRST® Robotics Competition, students will have to establish goals to create focus for completing and competing with their robot.

Students will have short-term goals to accomplish small tasks that will lead to the long-term goal of designing, building, programming, and operating a robot to complete the tasks on a competition field.

Students will complete the build of their robot in a specified amount of time established by the team and the competition schedule.

Depending upon how the team is structured, students will have to prioritize and complete tasks without direct oversight.

Teams and students will want to get better at every aspect of the program as they progress. Self-learning and experience are crucial to becoming more successful.

As part of FIRST® Robotics Competition, students are given the opportunity to explore and deepen their interest and knowledge into any topic to the level that they feel is most appropriate.

Depending on how the coach/mentor interacts with the team and focuses on teambuilding, students may have an opportunity to discuss career and life-long learning goals. In addition, participating in a *FIRST*® program may lead to a lifelong engagement with *FIRST*® as a future mentor, coach, or volunteer.

Students will examine previous experiences and the processes from past seasons to improve outcomes. If a team uses the self-reflection tools available to them, they will develop the skill of self-assessment and reflection as a method for improving.

Life and Career Skills	Social and Cross- Cultural Skills	Interact Effectively with Others	Know when it is appropriate to listen and when to speak	As part of FIRST® Robotics Competition, students engage in discussions and will have to know when it is appropriate to speak and listen to communicate effectively.
Life and Career Skills	Social and Cross- Cultural Skills	Interact Effectively with Others	Conduct themselves in a respectable, professional manner	As part of FIRST® Robotics Competition, students are expected to conduct themselves in a age-appropriate respectful manner and display Gracious Professionalism® in all activities.
Life and Career Skills	Social and Cross- Cultural Skills	Work Effectively in Diverse Teams	Respect cultural differences and work effectively with people from a range of social and cultural backgrounds	Depending upon the make-up of the team, or the participants at the competitions, students may interact with individuals from a range of social and cultural backgrounds. Many teams also work with other domestic and international teams. In addition, teams compete in alliances and must work with this partner team to obtain points on the competition field.
Life and Career Skills	Social and Cross- Cultural Skills	Work Effectively in Diverse Teams	Respond open-mindedly to different ideas and values	In order to develop a collective solution, students will have to be open-minded to different ideas and values.
Life and Career Skills	Social and Cross- Cultural Skills	Work Effectively in Diverse Teams	Leverage social and cultural differences to create new ideas and increase both innovation and quality of work	Depending upon the make-up of the team, or their community, students may be able to leverage social and cultural backgrounds to create an innovative solution. Many teams also work with other domestic and international teams. In addition, teams compete in alliances and must work with this partner team to obtain points on the competition field.
Life and Career Skills Life and Career Skills	Productivity and Accountability  Productivity and Accountability	Manage Projects Manage Projects	Set and meet goals, even in the face of obstacles and competing pressure Prioritize, plan and manage work to achieve the intended result	In order to focus the work, students will need to set and establish both short- and long-term goals in a focused amount of time.  Teams will set goals at the beginning of their meetings to help manage what they want to get done in each session and before each

Life and Career Skills	Productivity and Accountability	Produce Results	attributes associated with producing high quality products including the abilities to:  - Work positively and ethically  - Manage time and projects effectively  - Multi-task  - Participate actively, as well as be reliable and punctual  - Present oneself professionally and with proper etiquette  - Collaborate and cooperate effectively with teams  - Respect and appreciate	Students work collaboratively with their team to build and compete with a robot where each has responsibilities and must manage time and relationships effectively. Many teams also work with other domestic and international teams. In addition, teams compete in alliances and must work with this partner to obtain points on the competition field. All students are expected to maintain Gracious Professionalism® in all activities.
Life and Career Skills	Leadership and Responsibility	Guide and Lead Others	Use interpersonal and problem-solving skills to influence and guide others toward a goal	Students will use interpersonal and problem- solving skills to help their teammates complete tasks and achieve desired goals. Many teams also work with other domestic and international teams. In addition, teams compete in alliances and must work with this partner team to obtain points on the competition field.
Life and Career Skills	Leadership and Responsibility	Guide and Lead Others	Leverage strengths of others to accomplish a common goal	Students will leverage the strengths of their teammates to complete tasks and achieve desired goals while building and competing with the robot. Many teams also work with other domestic and international teams. In addition, teams compete in alliances and must work with this partner to obtain points on the competition field.
Life and Career Skills	Leadership and Responsibility	Guide and Lead Others	Inspire others to reach their very best via example and selflessness	Students can inspire teammates through their behavior and actions to complete tasks and achieve desired goals while always displaying Gracious Professionalism® at all times.
Life and Career Skills	Leadership and Responsibility	Guide and Lead Others	Demonstrate integrity and ethical behavior in using influence and power	Students work collaboratively with peers and are expected to always display Gracious Professionalism®.
Life and Career Skills	Leadership and Responsibility	Be Responsible to Others	Act responsibly with the interests of the larger community in mind	Students act in a responsible matter that considers the interests of their team and peers as they choose actions and are expected to always display Gracious Professionalism®.
